Re: Letter of Reference for Stryker Electrical Contracting

Dear Sir / Madam:

It is with great pleasure that Bouygues Civil Works Florida, Inc. ("BCWF") writes this reference letter for Stryker Electrical Contracting ("Stryker").

BCWF selected Stryker to provide a wide array of Electrical Services, including the installation and maintenance of surface Temporary power services for all operational needs such as power for the slurry & waste water plant, Temporary power service for all tunnel construction activities for the TBM Machine and its conveyor belt system as well as Fiber Optic installation, all in connection with the Port of Miami Tunnel Access and Improvement Project ("POMT").

Stryker not only maintained their operations on schedule but executed their works in a professional manner. Additionally, because Stryker was sensitive to the schedule needs of the Project, Stryker met BCWF's expectations with their can-do attitude, their understanding of and their passion for the task at hand.

The Port of Miami Tunnel is a successful project thanks in part to the dedication of the hundreds of businesses with whom BCWF had contracted. Stryker has become a part of the BCWF family and recommends Stryker without reservation.

Should further information be required, please do not hesitate to contact BCWF's Director Mr. Joe Folco at 305-894-1800.

Best Regards,

Joe Folco
Director

On behalf of BCWF
